### **[Young People & Alcohol Misuse - A review - March 2012](#)**

This paper summarises findings from a number of reports concerning Young People and alcohol, including work from the Trading Standards survey, the Joseph Rowntree Foundation and the Department of Education.

### **[Young Women Peer Research Project](#)**

ChaMPs commissioned a piece of peer led research to investigate attitudes and behaviours amongst young women regarding alcohol. In particular the research was to look at what could be protective factors for young women against harmful levels of drinking.

This research was conducted across Cheshire and Merseyside by the Child Health Development Unit in conjunction with the North West Regional Youth Work Unit. This report will be of interest to anyone commissioning or providing services to young women. You can also view the [young women peer research presentation](#)
